

## **Digital Biomarkers Decision Process Working Group Meeting Summary**

17 February 2023

Chairs: Vikas Sharma and Diane Hoffman

The working group met in person with 50 attendees present. After introductions a review of the previous meeting was presented, and a summary of the work conducted by the team since the last meeting. Prior to the working group meeting the core team identified areas of interest to digital biomarkers. The work streams and chair of each workstream were presented to the larger group and attendees were asked to join the work stream based on their areas of interest. A natural progression of the workstream resulted in a balanced number in each.

Workstreams:

- Glossary and Existing Resources – Team lead: Cara Pendergrass
- Clinical Validation – Team lead: Marc Aafjes
- Regulatory Adoption – Team lead: Brian Kirkpatrick
- User Experience – Team lead: Anzar Abbas

Each workstream was asked to establish objectives, methods, deliverables, and timelines.

Subgroups will continue meeting periodically. Next F2F full group meeting tentatively planned for February 2024.
