

Digital Biomarkers Decision Process Working Group
Chairs: Vikas Mohan Sharma and Anzar Abbas

The working group meeting was a success, with over 40 members in attendance despite the early start time. Co-chair Vikas Sharma introduced the session and welcomed the new co-chair, Anzar Abbas. Each of the four subgroup leaders gave brief presentations with updates on deliverables since the last meeting. The four subgroups remain the same: Glossary, Clinical Validation, Clinical Operations, and Regulatory Adoption. Members then split into their respective subgroups to pursue their individual agendas and meet their goals for the meeting. Afterward, the subgroups reconvened and provided summaries of their progress and updates on their goals for executing on the deliverables they decided upon. Progress on deliverables was encouraging, with each subgroup laying out a specific and detailed plan for their output over the next 12 months. The working group will convene again at the spring meeting next year.
