

Anzalee Khan

The Nathan S. Kline Institute for Psychiatric Research

Bio:

Anzalee Khan has over 15 years of experience in psychometrics, testing and measurement, and statistical analysis in CNS trials. She served as a statistical and psychometric lead in Clinical Data Sciences at several eCOA and Rater Training vendor companies where she developed processes for clinical data validation and implemented statistical methods for evaluating rater training methodologies, clinical algorithms and data surveillance techniques. Dr. Khan is a former American Society of Clinical Psychopharmacology (ASCP) New Investigator Award recipient, International Congress of Schizophrenia Research (ICOSR) Young Investigator Award recipient and European Psychiatric Association (EPA) Travel Award recipient and has recently completed a 5-year research grant from the US NIH to assess the relationship of genotypes and response to cognitive interventions. She has co-authored over 50 peer-reviewed publications and has contributed to book chapters and review articles on schizophrenia, Alzheimer's, Autism, and other mental health areas. She holds an appointment at Nathan S. Kline Institute for Psychiatric Research in Orangeburg, NY in the Psychopharmacology Research Program. She received her BA at SUNY Stony Brook, MA at SUNY Albany, and her MS and PhD from Fordham University. Her training is in statistics with a focus on psychometric and Bayesian applications in clinical trials.
