

# Kickstarting the Brain: Panel Discussion

- ECT - Methodological challenges:
  - Recruitment
  - Inability to use placebo
  - Stimulus optimisation
- TMS:
  - Neuronavigation?
  - Lateralisation
  - Role in maintenance
- Ketamine – lightside and dark side

# Kickstarting the Brain: Panel Discussion

- Statistical:
  - Placebo response to technologies
  - Bayesian considerations
- Regulatory - when to contact, combination product, post-marketing surveillance
- Combination / sequential treatment:
- Inadequate funding due to stigma
- Perceived lack of innovation
- No financial incentive
