

***Algorithms/Flags to Identify Clinical Inconsistency in the Use of Rating Scales in CNS RCTs Working Group***  
***26 October 2020***

Working group chairs Jonathan Rabinowitz and Nina Schooler presented the results of a survey circulated to ISCTM members to identify the next scale for the group to assess and announced the group's next project: the Hamilton Depression Rating Scale. The group discussed the history and use of the HAM-D. Calls will be scheduled soon to begin work on the manuscript.
