

Group Objectives:

- Identify knowledge/practice gaps related to suicide ideation and behavior assessment that lend themselves to resolution through
 - ISCTM-sponsored consensus meeting (tentative date: November 2015)
 - Establishment of a follow-on ISCTM SIB working group

Meeting Summary:

- Output from pre-meeting telecons was presented for group discussion
- Two topics were proposed for possible consensus meeting: (1) Best practices for SIB assessment in clinical trials and (2) trial design & methodology for SIB as an endpoint
- Discussion identified overlap between these two topics as well as additional new issues to be addressed

Next Steps:

- SIB WG will continue to meet via telecons to refine the topics and develop a consensus meeting proposal to present to ISCTM's Executive Committee in May
